## Question: 1

A company plans to migrate to Microsoft 365.

You need to advise the company about how Microsoft provides protection in a multitenancy environment. What are three ways that Microsoft provides protection? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Customer content at rest is encrypted on the server by using BitLocker.
- B. Microsoft Azure AD provides authorization and role based access control at the tenant layer.
- C. Customer content at rest is encrypted on the server by using transport layer security (TLS).
- D. Microsoft Azure AD provides authorization and role based access control at the transport layer.
- E. Mailbox databases in Microsoft Exchange Online contain only mailboxes from a single tenant.
- F. Mailbox databases in Microsoft Exchange Online contain mailboxes from multiple tenants.

**Answer: ABC**

Explanation:

<https://docs.microsoft.com/en-us/office365/securitycompliance/office-365-tenant-isolationoverview>

## Question: 2

You are the Microsoft 365 administrator for a company.

Your company plans to open a new office in the United Kingdom.

You need to provide penetration test and security assessment reports (or the new office).

Where can you locate the required reports?

- A. Data Governance page of the Security and Compliance portal.
- B. Compliance Manager page of the Services Trust portal
- C. Data Loss Prevention page of the Security and Compliance portal
- D. Regional Compliance page of the Services Trust portal

**Answer: D**

## Question: 3

HOTSPOT

An organization plans to deploy Microsoft Intune.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.  
NOTE: Each correct selection is worth one point.

Statement	Yes	No
Data protection can be selectively applied to applications.	<input type="radio"/>	<input type="radio"/>
Microsoft intune can define where corporate data is stored.	<input type="radio"/>	<input type="radio"/>
Once a device is registered with Microsoft Intune, device wipe will include the user's personal data.	<input type="radio"/>	<input type="radio"/>

**Answer:**

Statement	Yes	No
Data protection can be selectively applied to applications.	<input checked="" type="radio"/>	<input type="radio"/>
Microsoft intune can define where corporate data is stored.	<input checked="" type="radio"/>	<input type="radio"/>
Once a device is registered with Microsoft Intune, device wipe will include the user's personal data.	<input type="radio"/>	<input checked="" type="radio"/>

### Question: 4

DRAG DROP

Your company has a Microsoft 365 subscription.

You need to implement security policies to ensure that sensitive data is protected.

Which tools should you use? To answer, drag the appropriate tools to the correct scenarios. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Tools	Scenario	
Compliance Manager	Use the Microsoft Authenticator app to enable multi-factor authentication.	Tool
Identity and access management (IAM)	Classify documents to restrict permission to content.	Tool
Information rights management (IRM)	Use a dashboard for data-protection recommendations.	Tool
	Provide auditors and regulators with reports on data-protection status.	Tool

**Answer:**

**Scenario**

Use the Microsoft Authenticator app to enable multi-factor authentication.	Information rights management (IRM)
Classify documents to restrict permission to content.	Information rights management (IRM)
Use a dashboard for data-protection recommendations.	Compliance Manager
Provide auditors and regulators with reports on data-protection status.	Compliance Manager

**Question: 5**

**HOTSPOT**

You are planning a Microsoft Azure AD solution for a company.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statement	Yes	No
You can manage Azure AD-joined machines by using group policy.	<input type="radio"/>	<input type="radio"/>
Azure AD requires integration with Active Directory Domain Services by using secure lightweight Directory Access Protocol (LDAP).	<input type="radio"/>	<input type="radio"/>
Azure AD supports Azure AD Authentication Library (ADAL) authentication.	<input type="radio"/>	<input type="radio"/>

**Answer:**

Statement	Yes	No
You can manage Azure AD-joined machines by using group policy.	<input type="radio"/>	<input checked="" type="radio"/>
Azure AD requires integration with Active Directory Domain Services by using secure lightweight Directory Access Protocol (LDAP).	<input checked="" type="radio"/>	<input type="radio"/>
Azure AD supports Azure AD Authentication Library (ADAL) authentication.	<input type="radio"/>	<input checked="" type="radio"/>

### Question: 6

**HOTSPOT**

You are a Microsoft 365 administrator for a company. The company implements federated authentication.

For each of the following statement, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statement	Yes	No
Users have the same passwords in the cloud and on-premises.	<input type="radio"/>	<input type="radio"/>
Users must sign in again when using Microsoft 365.	<input type="radio"/>	<input type="radio"/>
You can configure federated authentication to require a smart card.	<input type="radio"/>	<input type="radio"/>

**Answer:**

Statement	Yes	No
Users have the same passwords in the cloud and on-premises.	<input checked="" type="radio"/>	<input type="radio"/>
Users must sign in again when using Microsoft 365.	<input checked="" type="radio"/>	<input type="radio"/>
You can configure federated authentication to require a smart card.	<input type="radio"/>	<input checked="" type="radio"/>

### Question: 7

**DRAG DROP**

A company plans to migrate to a hybrid cloud infrastructure.

You need to determine where to manage the environment after the migration is complete.

Match each item to the location where it will be managed. To answer, drag the appropriate item from the column on the left to its location on the right. Each item may be used once, more than once, or not at all.

NOTE: Each correct selection is worth one point.

**Configuration locations**

**Option**

Microsoft 365 only	Configure multi-factor authentication for cloud services.	Configuration location
on-premises only	Configure email disclaimers.	Configuration location
both Microsoft 365 and on-premises	Configure compliance.	Configuration location
	Set frequency of Microsoft Office 365 updates.	Configuration location

**Answer:**

**Option**

Configure multi-factor authentication for cloud services.	both Microsoft 365 and on-premises
Configure email disclaimers.	both Microsoft 365 and on-premises
Configure compliance.	Microsoft 365 only
Set frequency of Microsoft Office 365 updates.	on-premises only

**Question: 8**

**HOTSPOT**

You are a Microsoft 365 administrator.

You need to implement the appropriate features for each scenario.

What should you implement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Scenario**

Restrict access to Microsoft Outlook by using a PIN.

Mobile application protection policy  
Device configuration policy

Secure members of the Global Administrators group by using dynamic risk profiles.

Microsoft Azure AD Identity Protection  
Microsoft Azure AD Conditional Access  
Microsoft Azure AD Privilege Identity Management

Secure admin roles by requiring approvals.

Microsoft Azure AD Identity Protection  
Microsoft Azure AD Privilege Identity Management  
Microsoft Azure AD Domain Services

**Answer:**

**Scenario**

Restrict access to Microsoft Outlook by using a PIN.

Mobile application protection policy  
Device configuration policy

Secure members of the Global Administrators group by using dynamic risk profiles.

Microsoft Azure AD Identity Protection  
Microsoft Azure AD Conditional Access  
Microsoft Azure AD Privilege Identity Management

Secure admin roles by requiring approvals.

Microsoft Azure AD Identity Protection  
Microsoft Azure AD Privilege Identity Management  
Microsoft Azure AD Domain Services

**Question: 9**

Your organization plans to deploy Microsoft 365 in a hybrid scenario. You need to ensure that employees can use a smart card for authentication. Which hybrid identity solution should you implement?

- A. password hash synchronization with single sign on
- B. Active Directory federation Services (AD FS)
- C. Ping federate and federation integration
- D. pass-through authentication and single sign-on

**Answer: B**

## Question: 10

HOTSPOT

You implement Microsoft Azure Information Protection.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statement	Yes	No
You can supplement the default templates to apply restrictive controls.	<input type="radio"/>	<input type="radio"/>
Classification and protection information is available for on-premises file servers.	<input type="radio"/>	<input type="radio"/>
Installing the Azure Information Protection client installs an information protection bar to Microsoft Excel.	<input type="radio"/>	<input type="radio"/>

**Answer:**

Statement	Yes	No
You can supplement the default templates to apply restrictive controls.	<input checked="" type="radio"/>	<input type="radio"/>
Classification and protection information is available for on-premises file servers.	<input checked="" type="radio"/>	<input type="radio"/>
Installing the Azure Information Protection client installs an information protection bar to Microsoft Excel.	<input checked="" type="radio"/>	<input type="radio"/>
